

XtendM3 Extension Approval Form

EXT200MI.AddULReport - Omnicable

1. Project Information

Project / Customer Name	Omnicable
Planned Go Live Date	08/12/26 (MM/DD/YY)
Project Manager responsible for Billing or Clarity Tasks	Shiva Rudroju - srudroju@omnicable.com
Clarity Project ID or Infor Services Work Order Number	PR-004011
Developer Name	Muthupandi Muniyandi

2. Requirement Description

Requirement	EXT200MI - To store and retrieve the UL label print history for audit purpose in EXTULR table.
-------------	--

3. Solution Description

Extension / Transaction	EXT200MI/AddULReport
Solution Summary	Inserts or updates UL report records in EXTULR, including print count and audit fields.
Affected M3 Module	Order to Cash
Is this a new solution?	Yes
If not, what has been changed or updated?	Not Applicable

4. Database Access Assessment

Question	Response
Does it implement direct database access?	No
Is direct access done on M3 Standard Tables or Dynamic (XtendM3) Tables?	Yes
If M3 Standard Table direct database access: Is there a standard M3 API for the M3 standard table?	No
If yes, why was the M3 API not used instead of the direct database access?	Not Applicable
If no, was an enhancement request sent to product development to have an M3 API created for the M3 standard table?	No
Are indexes used to access the tables, using keys other than just the company and division?	Not Specified
Are expressions used to filter the database access? How many records are estimated to be retrieved if filter is not applied?	Not Specified
If Dynamic (XtendM3) Table direct database access: Is the dynamic table extending an M3 standard table?	No
If yes, have all dynamic table fields referenced to M3 standard table fields been validated to make sure they exist in M3 e.g. Order Number?	Not Applicable

5. Testing and Repository

Question	Response
Has this solution / extension been fully tested and functionally approved?	Yes
Provide link/url to the version controlled repository containing the extensions	https://github.com/Omnica/ExtendM3/src/main/groovy/com/omnicable/
Is the repository updated with the correct branches? If it is coming from TST tenant, the TST branch should be updated with these changes. Once signed extension for PRD is received, master/prd branch should be updated.	Yes

6. Standards and Compliance Checklist

Question	Response
Does the extension solution/codes contain parts that do not follow the guidelines/best practices, for which an exception/special approval is requested?	No
If so, why?	Not Applicable
Have you read the programming standards and made sure the code is compliant with the standards?	Yes
Have you followed the recommended naming conventions for extensions, methods, variables?	Yes
Have you documented the extension code?	Yes
Except for data setup, are there any other configuration or extension dependencies required to exist for this extension to work?	No
Is logger used in extension?	Yes
If yes, is it only using debug level? Extension will not be approved with any other logger level than debug.	Yes

7. Approval Summary

Approval Request	Requesting approval for EXT200MI.AddULReport to support UL label print history audit tracking for Omnicable.
Business Purpose	Maintain UL label print history in EXTULR for audit purpose.
Prepared By	Muthupandi Muniyandi
