

XtendM3 Extension Approval Request Form

Project: Alta Forest | Solution: EXT003MI - Complete Transfer Processing

Project / Customer Name	Alta Forest
Planned Go-Live Date	08/14/26 (MM/DD/YY)
Project Manager Responsible for Billing / Clarity Tasks	Adam Deisenroth (adam.deisenroth@ibpholdings.com)
Clarity Project ID / Infor Services Work Order Number	ICMSWO_83947
Developer Name	Muthupandi Muniyandi

1. Requirement Description

Alta Forest requires an XtendM3 solution to support and manage deck transfer details within delivery operations. The purpose of the extension is to streamline transfer completion processing and automate creation of the corresponding distribution order in M3.

The XtendM3 extension EXT003MI provides a controlled API transaction for completing the transfer process, reducing manual intervention and improving consistency for delivery-related processing.

2. Solution Description

A new XtendM3 extension, **EXT003MI**, has been developed for Alta Forest. The extension contains one transaction to complete transfers and create the related distribution order in M3.

Transaction	Purpose
EXT003MI/CompleteTransfr	Creates a distribution order in M3 and completes the transfer process.

Affected M3 Module	Delivery
Is this a new solution?	Yes
If not, what has been changed or updated?	Not applicable

3. Database Access Assessment

Question	Response
Does it implement direct database access?	No
Is direct access done on M3 Standard Tables or Dynamic (XtendM3) Tables?	No direct database access implemented.

If M3 Standard Table direct database access

Question	Response
Is there a standard M3 API for the M3 standard table?	Not applicable
If yes, why was the M3 API not used instead of the direct database access?	Not applicable
If no, was an enhancement request sent to product development to have an M3 API created for the M3 standard table?	No / Not applicable
Are indexes used to access the tables, using keys other than just the company and division?	Not applicable
Are expressions used to filter database access? How many records are estimated to be retrieved if filter is not applied?	Not applicable

If Dynamic (XtendM3) Table direct database access

Question	Response
Is the dynamic table extending an M3 standard table?	No
If yes, have referenced M3 standard table fields been validated to make sure they exist in M3 e.g. Order Number?	Not applicable

4. Testing and Repository Information

Question	Response
Has this solution / extension been fully tested and functionally approved?	Yes
Provide link/url to the version controlled repository containing the extensions	https://github.com/leanswift/ALta-xtend-M3.git
Is the repository updated with the correct branches?	Yes - TST branch should contain TST changes, and master/PRD branch should be updated after the signed PRD extension is received.

5. Standards, Compliance and Exceptions

Question	Response
Does the extension solution / code contain any part that does not follow guidelines or best practices and requires exception / special approval?	No
If so, why?	Not applicable
Have you read the programming standards and ensured the code is compliant?	Yes
Have you followed recommended naming conventions for extensions, methods and variables?	Yes
Have you documented the extension code?	Yes
Except for data setup, are there any other configuration or extension dependencies required to exist for this extension to work?	No
Is logger used in the extension?	Yes
If yes, is logger only using debug level?	Yes
Have the AI recommendations / feedback been addressed?	Yes

6. Developer Declaration

I confirm that the XtendM3 extension **EXT003MI** has been developed in accordance with XtendM3 development standards, follows approved coding practices, has undergone functional testing, and is ready for approval review and deployment.
